

GEF CSO Network Statement

Agenda item 5: Results Based Management

47th GEF Council Meeting, Washington DC, USA

The GEF CSO Network welcomes the document GEF/C.47/05 as we strongly support the further enhancement of GEF Results-based Management Systems.

We believe that enhanced monitoring and reporting of results is essential for the effective management of GEF and achievement of targeted results.

We support the four proposed actions.

With regard to Action 1 we are happy to see specific reference to the emphasis on gender. We would also like to highlight the conclusions of the OPS5 Sub study on CSO engagement in the GEF which recommended specific action to include clear indicators for engagement of civil society and other stakeholders in the GEF Results systems and also adjustment of the Project Management Information System (PMIS) to enable easy categorization and tracking of projects with different levels of CSO engagement.

We look forward to the update of progress in the future.
